Gates and Fences for your Home

innovation. stability. security.

Version 2024 (4th ed.)

Dear interested readers and customers,

We have been manufacturing high-quality aluminium gates and fences at our Wagna plant in Austria since 1992.

The products in the HOLLER HOME series are entirely geared to the private sector and are tailored precisely to your requirements and needs. Our gates and fences are flexible and versatile solutions, they come in a huge variety of designs and offer strong durability in daily use. Protect and beautify your property. Choose among different styles and designs to create your own unique gate and fence.

Our engineering team is focused on the development of innovative solutions but also works on the optimisation of existing products to potentially improve them.

We accompany every project from consulting, planning and technical clarification to shipping, and are on hand even after your project is completed to provide comprehensive support and service.

We hope you enjoy browsing through our catalogue. Feel free to contact us and we will be more than happy to assist.

Your Holler Tore Team

SALZBURG

Charming and iconic

Our classic style picket fences, available in any array of standard or special powder coat finishes, adapt beautifully to the surrounding environment of both period houses and modern buildings. Picket width 85 mm, picket thickness 20 mm with central rails, individual spacing approx. 40 mm (standard), approx. 15 mm or as privacy screen. Convex, straight or staggered - select from a wide variety of options.

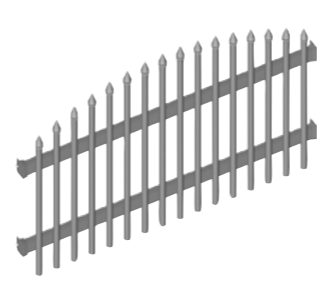

Traditional.

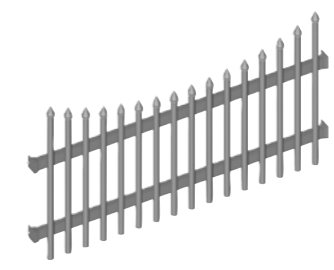

PARIS

Elegant and stylish

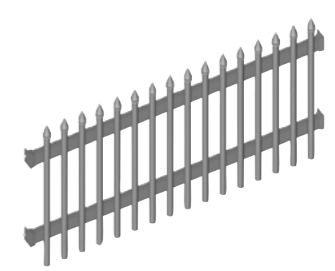

Elegant style for classic and period houses, and villas. Fence with smooth round bars, diameter 30 mm. Individual spacing between bars approx. 80 mm (standard), approx. 60 mm or less. We also provide two rows of fence in different heights.

Convex

Concav

Straight

Ball finial

Pointed finial

Flat finial

Onion dome finial

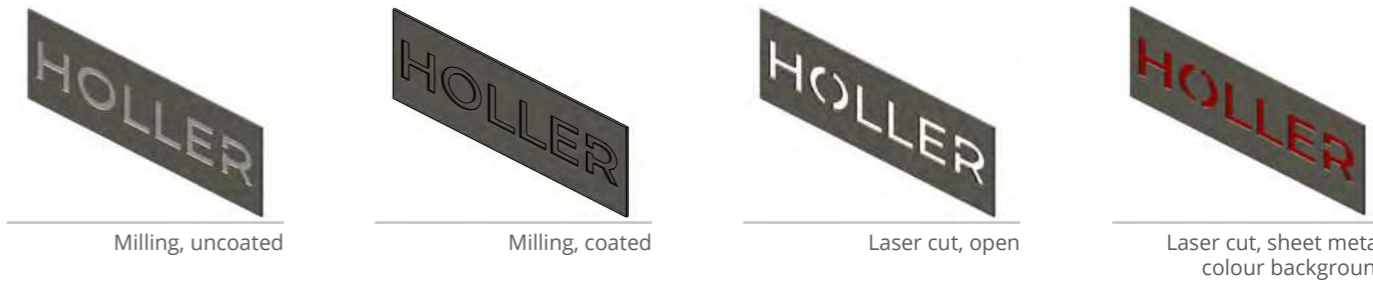

Straightforward and full of character

The timeless elegance of this model radiates a distinctive character and adds maximum privacy and protection to your property. Go for a single colour or mix up your design with multicolour finishes and add decorative elements. The genuine straightforwardness of the overall appearance is accentuated by incorporating concealed fixings.

Customised Solutions

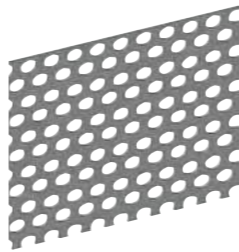

Round or square shapes, style and modern materials: Gates with character are real eye-catchers. Our engineering team manages the technical implementation of all customer-specific requirements. Tailor-made solutions such as milled patterns, laser cuts, illumination with LED lighting, individual logos, selected infills, and many more, transform each gate into a unique masterpiece.

PERFORA

Appealing and functional

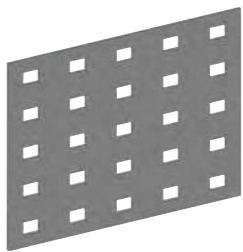

Exquisite style meets pristine design. A wide variety of perforation and punching patterns allows for custom-made solutions which aesthetically enhance the appearance of your property. For gates and fences, the perforated sheets are built into the static frame. Profiles for fences are available in four different designs.

CUMERA

Distinctive and beautiful

Wickerwork, Latin *cumera*, made of willow poles and wooden slats was used for thousands of years as fencing and privacy protection in various cultures around the world. We have rediscovered this design and manufacture decorative elements or privacy fences in three slat sizes. The coloured aluminium slats woven over coated or decorative stainless steel bars add a highly sophisticated touch.

Available slat widths
60 mm, 80 mm or 100 mm

Outstanding.

LAMELLA

Light and chic

The overlapping angled aluminium lamellae create a truly unique and decorative look and add style and privacy to your home. The aesthetically pleasing decorative grooves bring vibrant character, light and airy structure to any property. Model LAMELLA is the perfect solution wherever privacy needs protection. Available in heights up to 2 m and in different colours.

Motorisation and Design

Motor drives for sliding gates

HOLLER H60

- Motor drive for sliding gates in guide post
- Integrated emergency unlocking with flashing light
- Lock and key
- Connection voltage 230 V/50 Hz
- Duty cycle 30%
- Speed approx. 17 cm/s
- Max. gate width 6 m
- Max. gate weight 210 kg

Operation is permitted without active safety contact edge on the main and secondary closing edges.

Upper guiding/ guide roller bracket

The upper guiding/guide roller bracket is concealed within the top profile and thus protected from adverse weather conditions. The low-maintenance ball bearings guarantee a trouble-free operation also in unfavourable weather conditions.

Motor drives for swing gates

HOLLER H30 and HOLLER H50

Above ground motor drive

Reliable above ground motor drive in 24 V technology for swing gates up to 5 m (double leaf up to 10 m).

HOLLER H35

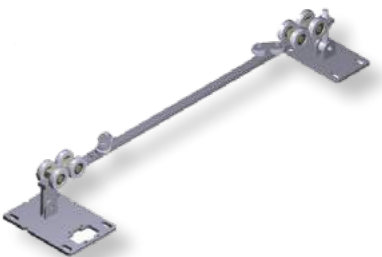

Underground motor drive

Convenient underground motor drive in 24 V technology for swing gates up to 3.5 m (double leaf up to 7 m).

Profiles

The static frame is made of high-strength extruded aluminium. Our profiles have been developed specifically for these applications, they are positively locking and highly durable.

Running gear

The sliding gates almost seems to “float” silently on the low-maintenance track rollers. Eight ball-bearing support rollers and four ball-bearing cross rollers ensure smooth running and perfect weight distribution. The entire running gear is mounted on hot-dip galvanised dowel plates.

Smart Columns

Smart Columns

Discover our wide range of aluminium control and intercom columns. Design your unique house number using laser cut, illumination, milling or stainless steel. Absolute weather resistance guarantees a long service life.

- 150 x 150 mm, aluminium, screw mounted flat lid
- Max. height 2,500 mm
- Inside, screwed service access, opening 100 x 200 mm, door 130 x 230 mm
- Round or square cut-outs for integration of access control systems such as video and intercom systems

Letterbox column

Letterbox columns are a prestigious and beautiful choice for any property. Our custom-made letterbox columns are characterised by noble simplicity and high functionality. Design your unique house number using laser cut, illumination, milling or stainless steel.

- Stainless steel flap or flush-mount aluminium slot
- High-quality aluminium column
- Concealed mounting (from outside)
- Designed to integrate with other gate and fence solutions made by HOLLER
- Round or square cut-outs for integration of access control systems such as video and intercom systems

Parcel box column

With e-commerce becoming increasingly prevalent in the global landscape, uncomplicated and reliable delivery receipt is now more essential than ever before. Design your unique house number using laser cut, illumination, milling or stainless steel.

- Parcel box drop outside
- Parcel box collection inside
- High-quality aluminium column
- Drain channels
- Designed to integrate with other gate and fence solutions made by HOLLER
- Round or square cut-outs for integration of access control systems such as video and intercom systems
